

Telehealth

Talk to a doctor in minutes, 24/7

Telehealth

Telehealth is a rising benefit option that employers are choosing to offer their employees. Telehealth is meant to reduce time and money spent in urgent care or emergency rooms, provide easy, convenient services, and improve the health of your organization. Navia partners with Teladoc to provide members with phone, video and mobile app access to licensed US physicians 24 hours a day, seven days a week with zero out-of-pocket costs for virtual visits.

Delivering Value

Healthcare is becoming more and more complex each day and finding quality, affordable benefits can leave members of your organization feeling overwhelmed and exhausted. Through our partnership with Teladoc, we can make a significant impact by providing value to both your company and your employees.
